You may be asked to demonstrate/explain your work to the tutor, if you are absent/unavailable or fail to demonstrate properly, zero marks will be awarded.

Text book: Deitel, H M & Deitel, P J 2013, C: How to program, 7th edn, Pearson Prentice-Hall, Upper Saddle River, New Jersey.

1. Discuss the advantages and disadvantages in breaking a big program of single source file into multiple source files.

2. Looking into programs you developed in previous weeks (Week 1 to Week 8), which programs should be written in multiple modules? Name three and explain why they need to be rewritten into multiple source files.

3. Try to rewrite your program in Week 4 Question 2 into multiple files, e.g. more than one .c file and .h header.
